

Domestic Movement Procedure

In line with one of the mandates of the BPI- National Plant Quarantine Services Division which is to prevent further spread of pests already existing in the country, the NPQSD is regulating the movement of plants, planting materials and plant products through the issuance of a *BPI “Q” Form 12 “Permit for Domestic Transport of Plants/Plant Products”*. This permit will ensure that all allowable plants bound for other parts of the country were inspected and found to be substantially free from plant pests. This permit is being issued in all the National Plant Quarantine Services offices throughout the country including airports and seaports. ***List of Plants/Plant Products not allowed for domestic transport.***
